Description

State of the art logistics trolley equipped with the CLADIS pneumatic braking system. Our roll container can be delivered fully equipped.

Base frame made of screwed aluminum system profiles, weatherproof and non-slip film coated plywood panel. Either with 4 braked swivel castors Ø 200 mm or with 2 braked swivel castors and 2 fixed castors, all swivel castors with ball bearings. Brakes resistant to dust, moisture, and oil. All swivel castors with directional lock, ergonomic antiskid handlebar. Optional long-lasting reflective markings on the side of the profiles, impact protection, fork lift pockets.

Lower platform height approx. 320 mm from floor, maximum load 500 kg.

- Pneumatic telescopic light mast extendable by hand pump
- 2-level mounting with brackets for 1 ALDEBARAN 360 GRAD FLEX-C 2.0 Series light
- 1 petrol powered 2 kVA generator
- 2 cable reels
- 1 fuel can of 10 or 20 l.

The lower level is equipped with 2 drawers (600 x 400 x 220 mm) made of plastic for attaching accessories.
