# Folding Bed, Aluminium frame, 197 cm

## Product Images

## Short Description

The folding field bed is a rugged, durable cot, manufactured to industry specifications. The bed comes in a protective bag, made from the same material. It secures and protects the bed no matter where it is stored.

## Description

LANCO's folding beds are built and outfitted with fabric designed for the demands of military and emergency use.

### ALUMINIUM FRAME

The CLADIS aluminium frame cot prioritizes lightweight portability while maintaining exceptional user support. This is achieved through a hybrid steel and lightweight alloy construction that minimizes weight without sacrificing strength. Additionally, the solid construction requires minimal maintenance, and the user-friendly folding mechanism allows for quick and effortless setup and takedown.

### FABRIC

The fabric of CLADIS's aluminium folding beds is made of a robust PU-coated polyester fabric, both durable and strong. With a tensile strength exceeding 1700 N/5cm, tear resistance greater than 60N (warp and weft), and a 550 dtex titre of yarn, this material is built for long-lasting performance. The fabric is breathable, allowing for a comfortable night's sleep. Its resistance to mould and mildew ensures the bed stays clean and hygienic, even in humid environments or after prolonged storage. Easy to clean and maintain, the stain-resistant material allows for quick and simple care with readily available detergent.
