

Portable toilet PACTO

Product Images

Short Description

PACTO toilets work without any need for water and electricity, featuring an eco-friendly system for challenging environments with a biodegradable flush foil made of corn starch.

Description

The PACTO toilet offers a revolutionary solution for sanitation in remote and challenging environments. This waterless and electricity-free system thrives where conventional toilets struggle, making it ideal for:

- Remote locations: Camps, mines, field hospitals, and military operations.
- Disaster preparedness: Stock up for emergencies and natural disasters.
- Adaptability: Works efficiently in any weather condition.

Key Features:

- Biodegradable flush foil: Made from corn starch, requiring no harsh chemicals.
- Easy handling: User-friendly in all weather conditions.
- Odorless operation: No unpleasant smells thanks to encapsulated waste.
- Convenient waste disposal: Removable container for regular emptying.
- Eco-friendly design: Minimizes water usage and environmental impact.

PACTO's versatility, ease of use, and sustainability make it the go-to choice for:

- Organizations working in remote areas.
- Individuals seeking preparedness solutions.
- Anyone committed to environmental responsibility.
